Press release from AFRY

AFRY launches Efterklang™ and Light Bureau

As of 25 November, ÅF Pöyry is called AFRY. As part of our brand change, we are also enhancing our offers within acoustics and lighting design by creating two new brands: Efterklang™ and Light Bureau.

AFRY is an engineering and design company within the fields of energy, industry and infrastructure. We create sustainable solutions for the next generation through talented people and technology. In the area of design, we offer – amongst other things – acoustics and lighting design. Now these will go under new names – ÅF Lighting will become Light Bureau and ÅF Sound & Vibration will become Efterklang™.

“AFRY is today an engineering and design consultancy. With the launch of Light Bureau and Efterklang™ we aim to enhance two of our unique offers. Our acousticians and lighting designers are leading within their respective industries, and that is why it is great to be able to further strengthen their offers,” says Jonas Gustavsson, CEO and President at AFRY.

Efterklang™ is the leading competence centre in Europe, providing advice on acoustics vibration control and sound design. Our expertise spans a broad range and scale of acoustic challenges from building acoustics, industry noise, community noise, product design and sound design.

AFRY's lighting designers are leading in Scandinavia and are among the biggest in lighting design of interior as well as exterior environments around the world. Light Bureau develops inspiring lighting design for both public and private places through close cooperation with architects, subcontractors, authorities and municipalities.

Aside from Efterklang™ and Light Bureau, AFRY's other brands, including Konzept, Gottlieb Paludan Architects, sandellsandberg and InUse, will remain.
