AFRY signs a strategic framework agreement with Volvo Cars

AFRY has entered into a framework agreement with Volvo Cars as strategic supplier in engineering. Effective immediately, the agreement spans until 2026 and outlines AFRY's role in delivering product development across all areas of Volvo Cars' operations.

The framework agreement means that AFRY contributes technical services to Volvo Cars' innovative development projects, where AFRY provides competence in mechanics, design, embedded systems, software, technical documentation, and calculations. This work covers the entire vehicle fleet and supports Volvo Cars' ambitious goals in creating electrified, next-generation vehicles.

The agreement builds on AFRY's proven ability to deliver end-to-end engineering solutions across multiple disciplines.

"This collaboration strengthens the trust and commitment between AFRY and Volvo Cars to drive innovative solutions together. We are proud to contribute to the development of future cars, with electrification at the forefront" said Martin Öman, Head of Division Industrial & Digital Solutions at AFRY.
