Press Release from AFRY

AFRY to strengthen Sweden's energy system through two framework agreements with Svenska Kraftnät

AFRY has signed two strategic framework agreements with Svenska Kraftnät, the Swedish national grid operator, to provide technical consultancy and design planning services. These agreements mark a significant step in supporting Sweden's energy transition and infrastructure development.

Under the first agreement, AFRY will deliver technical consultancy services across various areas of expertise. The scope includes project management, technical support, sustainability and quality, and electricity market and power systems. Covering approximately 60 consultancy roles, the agreement enables Svenska Kraftnät to procure both resource-based and assignment-based consultants.

The second agreement focuses on design planning services for overhead lines, power cables, station locations, geotechnical investigations, and permit management. AFRY will be responsible for delivering complete consultancy assignments, including equipment and documentation.

"We are proud to support Svenska Kraftnät in strengthening Sweden's electricity infrastructure and accelerating the transition to a sustainable energy system. These agreements reflect AFRY's deep expertise and commitment to delivering high-quality, future-proof solutions," says Tord Karlberg, VP & Head of Transmission & Distribution Nordics at AFRY.

The contract period for the agreements is six and eight years, respectively.
