

ChromoGenics receives a first reference order from Vasakronan

ChromoGenics AB (publ) receives a first reference order from Vasakronan, Sweden's largest real estate company. The order includes approximately 25 sqm dynamic glass to an office building in central Uppsala. Delivery will take place during the second quarter of 2018.

The order is a retrofit project where existing windows will be upgraded with ConverLight® glass laminates in Vasakronan's office building on Dragarbrunnsgatan in central Uppsala. At the top floor of the property, the tenant GeoSigma has a number of conference rooms and offices. In these rooms, a total of approximately 25 sqm ConverLight® glass laminates will be installed to provide increased indoor comfort for tenants and visitors. Delivery will take place during the second quarter of 2018.

"For ChromoGenics, this is a prestigious order to Sweden's largest and most reputable real estate company. Vasakronan also has a leading position in the sustainability field. We focus on commercial and service buildings where we provide sustainable dynamic climate control with increased energy efficiency and improved indoor comfort with maintained view to the outside world. This order is another important proof point that ChromoGenics is on the right track," says Thomas Almesjö, CEO ChromoGenics.

ChromoGenics' dynamic glass ConverLight® offers property owners, architects, energy consultants, construction companies and window- and facade glass operators an attractive and cost effective solar control solution. ConverLight® increases energy efficiency and indoor comfort in real estates as well as contributes to environmental certification, which is high on the environmental agenda for both the EU and real estate owners in their efforts for greater sustainability.

About ChromoGenics

ChromoGenics offers dynamic glass with controllable heat- and light transmission. The company's unique technology ConverLight® provides sustainable solar control for increased indoor comfort and energy efficiency. ConverLight® also contributes to Green Building certifications. In 2016 the company started commercial sales to real estate projects in Scandinavia.

ChromoGenics is located in Uppsala, Sweden, and the technology is derived from the world leading research center at Ångström Laboratory at Uppsala University. The plant has been partly financed by a conditional loan from the Swedish Energy Agency. ChromoGenics share (CHRO) is listed on Nasdaq First North Stockholm with G&W Fondkommission as Certified Adviser.
