

ChromoGenics

ChromoGenics receives new order totaling approximately SEK 0.7 million

10th November 2021

ChromoGenics receives a new order for ConverLight® Dynamic of approximately SEK 0.7 million from LEIAB.

The order includes a delivery of dynamic glass to a municipal nursing home, Teglagården in Skara, including ConverLight® Dynamic and control system with delivery in the spring of 2022. With this upgrade, improved protection against solar heat radiation, a high insulation value and improved noise reduction are obtained. For the elderly, it is also especially good that the difference between shadows and light is toned down. We have made several deliveries together with LEIAB, which is a Swedish manufacturer of quality windows for the Scandinavian market. For the property owner, the measure means lower operating costs and better comfort for the tenant.

“We are very happy that LEIAB and Skara municipality show us confidence and choose to improve their property with ConverLight® glass and technology from ChromoGenics. Studies show that our technology contributes to an improved indoor environment and increased well-being. It is inspiring for everyone at ChromoGenics to be able to contribute to an improved environment and well-being for our seniors.” says Fredrik Fränding, CEO of ChromoGenics.

This statement has been made in a Swedish and English version. In the event of any discrepancies between the Swedish and English text, the Swedish text shall prevail.

About ChromoGenics

ChromoGenics is a proptech company that produces dynamic glass for real estate. The company's product ConverLight® Dynamic, controls indoor comfort with high daylight transmission, great view and solar heat blocking and thereby reduces cost of cooling. ConverLight® Dynamic is based on a patented solution where electrochromic coatings are laminated in plastic film and then laminated between glass. The plastic film is easy to transport, so long shipments of bulky glass can be avoided. ChromoGenics also offers static glass, ConverLight® Static, and the ConverLight® Energy facade glass solution. ChromoGenics' stock was listed on Nasdaq First North Growth Market in 2017 and has supplied glass technology to several major real estate companies.

ChromoGenics originates from world-leading research at Ångströmlaboratoriet at Uppsala University. The company's production facility in Uppsala has been partially financed with conditional loans from Energimyndigheten (Energy Authority) in Sweden. ChromoGenics' share (CHRO) is listed on Nasdaq First North Growth Market with Erik Penser Bank as Certified Adviser: certifiedadviser@penser.se, 08-463 83 00. <http://www.chromogenics.com>
