Launch: Outdoor enclosure from Ericsson doubles radio capacity in same footprint

- Provides twice the radio capacity in same footprint while minimizing installation time
- Multiple climate options give optimum energy efficiency in any environment
- Light-weight, modular, standardized, cabinet enables savings in roll-out and maintenance

As traffic capacity needs grow, Ericsson (NASDAQ: ERIC) introduces a modular All-in-One Outdoor Enclosure that houses and powers high-capacity mobile broadband sites. Built to complement its RBS 6000 portfolio, the maximum high-capacity configuration houses up to 8 digital units, 18 radios and 4 MINI-LINK hops in a footprint of less than 0.5 square meters (70 x 70 cm).

The All-in-One Outdoor Enclosure encapsulates multi-standard radio, transmission, power and climate equipment with savings potential for areas with mild to warm climates. The modular system minimizes footprint, installation time, maintenance and cost, and can be upgraded to fit specific site needs, using tailor-made configurations.

When configured as a high-capacity outdoor radio base station, the All-in-One Outdoor Enclosure can provide capacity for up to 8 digital and up to 12 radio units for all relevant radio standards and frequency bands. It can also be used as a main unit in a main remote configuration using up to 16 internally installed digital units and up to 18 remote radio units, or a combination of macro and main-remote.

Thomas Norén, Vice President and Head Product Area Radio, Business Unit Networks, Ericsson says: “Optimizing outdoor enclosures is an important area for operators to reduce time-to-service. The All-in-One Outdoor Enclosure helps them to add capacity cost-efficiently, enabling them to handle the massive data growth in the Networked Society.”

The All-in-One Outdoor Enclosure is designed to work across Ericsson’s entire RBS6000 product portfolio. Visitors to Mobile World Congress can see an example of the All-In-One Outdoor Enclosure in Hall 2.

During Mobile World Congress 2014 in Barcelona, Spain, Ericsson is showing world-leading technology and service capabilities and innovations. We believe that anything that benefits from a connection will be connected, and we lead the way with solutions that drive the development in mobility, broadband and the cloud, creating the foundation for ecosystems and transformation across industries. We are your guide in the Networked Society.

Welcome to our media and analyst briefing, Monday, February 24, 08:30am CET. You can find us at MWC in Hall 2, Stand 2S60. RSVP to media.relations@ericsson.com

Follow us during the event using @Ericsson and @Networked_Soc and join the discussion using #MWC14.
Insights from our experts and Networked Society evangelists are also published on our blog during the event.

About Ericsson base stations

Ericsson is a world-leading provider of communications technology and services. We are enabling the Networked Society with efficient real-time solutions that allow us all to study, work and live our lives more freely, in sustainable societies around the world.

Our offering comprises services, software and infrastructure within Information and Communications Technology for telecom operators and other industries. Today 40 percent of the world's mobile traffic goes through Ericsson networks and we support customers’ networks servicing more than 2.5 billion subscribers.

We are more than 110,000 people working with customers in more than 180 countries. Founded in 1876, Ericsson is headquartered in Stockholm, Sweden. In 2013 the company’s net sales were SEK 227.4 billion (USD 34.9 billion). Ericsson is listed on NASDAQ OMX, Stockholm and NASDAQ, New York stock exchanges.
