Börje Ekholm, President and CEO, said: "Our Q2 results demonstrate solid execution of our strategic and operational priorities. We achieved a three-year high in adjusted EBITA margin, supported by continued efficiency actions. We have structurally lowered our cost base and are strongly focused on delivering further efficiencies.

It is encouraging that Americas' growth continues, and that Europe has stabilized. Global fixed wireless access (FWA) customers have now surpassed 160 million and are driving significant network traffic. Penetration of 5G standalone is still limited but is needed to fully support AI use cases at the edge, requiring ultra-low latency and enhanced uplink performance.

Looking ahead, we are increasing AI investments, including in our Sweden AI factory consortium. AI is key to accelerating innovation, as well as driving internal operational efficiencies. The ecosystem for network APIs continues to grow, and Aduna expanded its Network API reach to all three major service providers in Japan.

Cash flow

Cash flow from operating activities was SEK 4.2 (9.3) b. Adjusted EBITA was higher YoY, however Q2 2024 cash flow benefited from a significant reduction in operating working capital, reflecting the completion of large-scale roll-out projects and inventory reductions.

In Q2 2025, operating net assets increased, primarily due to lower deferred revenues.

Cash flow from investing activities was SEK -10.9 (-6.0) b., primarily driven by increased investments in interest-bearing securities.

In Q2 2025, net investments in interest-bearing securities amounted to SEK -9.7 b.

In Q2 2025, cash flow from financing activities was SEK -3.5 (-5.7) b., benefiting from collateral received for derivative contracts.

In Q2 2025, the first dividend payment to shareholders of SEK -4.8 b. and repayment of lease liabilities were partly offset by a positive effect from collateral received for derivative contracts. The second dividend payment will be made in October to the shareholders of the parent company.

Financial position

Gross cash decreased sequentially by SEK -0.9 b. to SEK 73.3 b. driven by dividends paid, partly offset by positive free cash flow before M&A and collateral received on derivatives.

During the quarter, Ericsson replaced its USD 1.0 b. liquidity revolving credit facility, maturing in May 2026, with a new USD 0.5 b. facility maturing in May 2027. By the end of Q2, the total unutilized committed credit facilities amounted to SEK 23.7 b. (USD 2.5 b.).

The average maturity of parent company borrowings was 3.2 years as of June 30, 2025, compared with 3.5 years as of June 30, 2024.

Net cash decreased sequentially by SEK -2.6 b. to SEK 36.0 b. driven by dividends paid, partly offset by positive free cash flow before M&A.

Liabilities for post-employment benefits increased to SEK 24.9 b. from SEK 21.8 b. in Q1 2025. The Swedish defined benefit obligation (DBO) was calculated using a discount rate based on the yields of Swedish government bonds. If the discount rate had been based on Swedish covered mortgage bonds, the liability for postemployment benefits would have been approximately SEK 11.1 b., which is SEK 9.6 b. lower than current DBO.

Other information

Legal proceedings involving governmental authorities

In February 2022, Ericsson publicly disclosed that an internal investigation in 2019 included a review of the conduct of Ericsson employees, vendors and suppliers in Iraq during the period between 2011 to 2019. The investigators could not determine the ultimate recipients of any payments, nor identify that any Ericsson employee was directly involved in financing terrorist organizations. The Company's 2019 internal Iraq investigation did not conclude that Ericsson made or was responsible for any payments to any terrorist organization.

The Company continues to fully cooperate with the DOJ in its investigation into matters discussed in the 2019 internal Iraq investigation report and related topics concerning jurisdictions including Iraq, and the Company is providing additional documents and other information which continue to be requested by the DOJ. As additional information continues to be identified and evaluated in continued cooperation with the DOJ during its ongoing investigation, it is expected that there will not be any conclusive determinations on the outcome until the investigation is completed. The scope and duration of the investigation remains uncertain.

As part of its defense to a now settled patent infringement lawsuit filed by Ericsson in 2013 in the Delhi High Court against Indian handset company Micromax, Micromax filed a complaint against Ericsson with the Competition Commission of India. The Competition Commission of India decided to refer the case to the Director General's Office for an in-depth investigation. The Competition Commission of India opened similar investigations against Ericsson in January 2014 based on claims made by Intex Technologies (India) Limited and, in 2015, based on a now settled claim from iBall. Ericsson has challenged Competition Commission of India's jurisdiction in these cases before the Delhi High Court. On July 13, 2023, the Division Bench of the Delhi High Court found that in this instance the Competition Commission of India has no power to conduct the pending investigations against Ericsson. The Competition Commission of India has appealed this order to the Supreme Court of India.

In April 2019, Ericsson was informed by China's State Administration for Market Regulation Anti-monopoly Bureau (SAMR) that SAMR has initiated an investigation into Ericsson's patent licensing practices in China. Ericsson is cooperating with the investigation, which is still in a fact-finding phase. The next steps include continued fact-finding and meetings with SAMR in order to facilitate the authority's assessment and conclusions. In case of adverse findings, SAMR has the power to impose behavioral and financial remedies.

Legal proceedings not involving governmental authorities

In August 2022, a civil lawsuit was filed in the United States District Court for the District of Columbia against Telefonaktiebolaget LM Ericsson and Ericsson Inc. (collectively, the "Ericsson defendants"). The lawsuit was brought by US military service members, employees of US government contractors and other civilians who were killed or injured in terrorist attacks in Iraq, Afghanistan and Syria from 2005 to 2021, as well as by their family members. The lawsuit asserts claims against the Ericsson defendants under the U.S. Anti-Terrorism Act alleging that the Ericsson defendants made payments that ultimately aided the terrorist organizations that committed, planned or authorized the attacks. In November 2022, the Ericsson defendants filed a motion to dismiss the complaint. On December 20, 2022, plaintiffs filed an amended complaint, which added additional plaintiffs, including a plaintiff injured in Turkey, and also named Ericsson AB (collectively with the Ericsson defendants, the "Ericsson corporate defendants"), President and CEO Börje Ekholm and a former employee (who has not been served with process) as additional defendants and also asserted additional allegations and claims. In March 2023, the Ericsson corporate defendants and Mr. Ekholm filed motions to dismiss the amended complaint. Plaintiffs filed their oppositions to defendants' motions to dismiss the amended complaint in June 2023, and defendants filed reply briefs in support of their motions to dismiss in July 2023. All briefing has been submitted, and resolution of the matter is pending with the District Court. All defendants will continue to vigorously defend this matter.

In February 2024, a second civil lawsuit also alleging violations of the U.S. Anti-Terrorism Act was filed in the United States District Court for the District of Columbia. The lawsuit was filed by the same law firm and involves substantially similar factual allegations and claims as those made in the Anti-Terrorism Act lawsuit originally filed in August 2022, and similarly names the same Ericsson corporate defendants, President and CEO Börje Ekholm and a former employee as defendants. The new lawsuit was brought by additional US military service members, employees of US government contractors and other civilians who were killed or injured in terrorist attacks in Iraq, Afghanistan, Syria, Turkey, Niger, and France from 2005 to 2021, as well as by their family members. The District Court for the District of Columbia has stayed the proceedings in this matter pending its decision on the motions to dismiss in the earlier-filed suit. The defendants will vigorously defend this matter.

Beginning on August 4, 2023, a number of civil lawsuits have been filed against Telefonaktiebolaget LM Ericsson in Solna District Court, Sweden. 93 claimants have filed suit, which are coordinated and financed by a UK-based litigation funder. The claimants consist of a group of non-Swedish funds and financial institutions that allegedly are or have been shareholders of the Company. Their damages claims are primarily based on alleged inadequate disclosure of the contents of the Company's 2019 internal Iraq investigation report. Ericsson filed its statement of defense on March 15, 2024. On February 14, 2025, the District Court ordered Ericsson to produce the 2019 internal Iraq investigation report to the claimants' external counsel. Ericsson has appealed the decision. While proceedings on the merits of the case are stayed pending final resolution of the document production issue, the District Court has scheduled a preliminary hearing for October 16, 2025. Ericsson will continue to vigorously defend this matter.

The Company actively manages its IPR portfolio and its need for third-party licenses and is involved from time to time, in the ordinary course of business, in litigation related thereto, as plaintiff, defendant and other capacities.

In addition to the proceedings discussed above, the Company is, and in the future may be, involved in various other regulatory investigations, lawsuits, claims (including claims by third-parties the Company has indemnified against infringement liability or provided guarantees to) and proceedings incidental to the ordinary course of business.

Accounting policies

The Group

This condensed consolidated interim financial report for the reporting period ended June 30, 2025, has been prepared in accordance with International Accounting Standard IAS 34 "Interim Financial Reporting". The term "IFRS" used in this document refers to the application of IAS and IFRS as well as interpretations of these standards as issued by IASB's Standards Interpretation Committee (SIC) and IFRS Interpretations Committee (IFRIC). The accounting policies adopted are consistent with those of the annual report for the year ended December 31, 2024, and should be read in conjunction with that annual report. Amendments to IFRS standards that became effective during 2025 do not have a material impact on the result and financial position of the Company.

Changes applied from Q1 2025

New market area structure implemented in Q1 2025

On February 25, 2025, it was announced that effective March 15, 2025, two new market areas are created – market area Americas and market area Europe, Middle East and Africa. This is done by merging market area Europe and Latin America, market area North America, and market area Middle East and Africa. From Q1 2025 the following market area structure is presented:

- Americas
- Europe, Middle East and Africa
- South East Asia, Oceania and India
- North East Asia

The financial reporting by market areas is reflecting the new structure and prior quarters have been restated accordingly.

Updated definitions of Alternative performance measures (APMs)

Starting from Q1 2025 the Company has decided to update the definitions of the following APMs. The Company believes the updated definitions better reflect the underlying results of the Company's operations over time.

- Return on capital employed (ROCE)
- Capital turnover (CTO)
- Inventory turnover days (ITO)
- Days sales outstanding (DSO)
- Days payables outstanding (DPO)
- Operating working capital days

The APMs are now based on a rolling average rather than an average of the beginning and the end of the period. Prior periods have been updated accordingly. In addition, Operating working capital has been added as an APM. For more information, see the APM section in this report.

Alternative performance measures (unaudited)

In this section, the Company presents its Alternative Performance Measures (APMs), which are not recognized measures of financial performance under IFRS. The presentation of APMs has limitations as analytical tools and should not be considered in isolation or as a substitute for related financial measures prepared in accordance with IFRS.

APMs are presented to enhance an investor's evaluation of ongoing operating results, to aid in forecasting future periods and to facilitate meaningful comparison of results between periods.

Management uses these APMs to, among other things, evaluate ongoing operations in relation to historical results, for internal planning and forecasting purposes and in the calculation of certain performance-based compensation. APMs should not be viewed as substitutes for income statement or cash flow items computed in accordance with IFRS.

This section also includes a reconciliation of the APMs to the most directly reconcilable line items in the financial statements. For more

information about non-IFRS key operating measures, see Ericsson Annual Report 2024.

From Q1 2025, the definition of Return on capital employed (ROCE) and Capital turnover (CTO) have been updated and is based on a rolling average rather than an average of the beginning and the end of the period. Prior periods have been updated accordingly. Operating working capital has been added as an APM.

From Q1 2025, the definitions of Inventory turnover days (ITO), Days sales outstanding (DSO), Days payables outstanding (DPO) and Operating working capital days have been updated and can be found in the end of this report. Prior periods have been updated accordingly.

The Company believes the updated definitions better reflect the underlying results of the Company's operations over time.

Additionally, Ericsson provides forward-looking targets for adjusted EBITA margin and Free cash flow before M&A as a percentage of net sales, which are non-IFRS financial measures. Ericsson has not provided quantitative reconciliation of these targets to the most directly comparable IFRS measures because certain information needed to reconcile these non-IFRS financial measures to the most comparable IFRS financial measures are dependent on specific items or impacts that are not yet determined, are subject to incarcerating and variability in timing and amount due to their nature, are outside of Ericsson's control or cannot be predicted, including items and impacts such as currency exchange rate changes, acquisitions and disposals, and charges such as impairments or acquisition related charges. Accordingly, reconciliation of these non-IFRS forward-looking financial measures are not available without unreasonable efforts. Such unavailable reconciling items could significantly impact our results of operations and financial condition.
