## Trademark certificate granted for Bestic in China

**Camanio Care has been granted a trademark certificate for Bestic<sup>®</sup>, the assistive eating device. The product is thereby officially registered on the Chinese market.**

The Chinese market for care technology is one of the most essential ones in the world. The new trademark certificate provides protection against trademark infringements, which gives the company an increased security.

### Growing demand on the Chinese market

According to DESA, the United Nation's Department of Economic and Social Affairs, the aging population in China is expected to grow by 71 per cent between 2015 and 2030. Moreover, there is a growing concern regarding the country's future aging population, since they are expected to have a limited number of people who can support and care for them. These challenges imply that the need for digital solutions within health care will increase in the coming years.
