

## Exel Composites awarded for the third consecutive year with first prize in the Best investor pages on the web-competition (small cap category)

EXEL COMPOSITES PLC

INVESTOR NEWS

26 MAY 2020 at 12:45 EET

Exel Composites was awarded for the third consecutive year with the first prize in the Best investor pages on the web-competition (small cap category). The competition is organized annually by the Finnish Foundation for Share Promotion and the Finnish Society of Financial Analysts.

At Exel Composites we have consistently improved the visibility and quality of our investor communications. In addition to the acclaimed Investor site, we have recently (Q1 2020) also published a renewed Business Review, the content and design of which have been developed based on the feedback collected from investors and analysts. For example, revenue distribution will in the future be reported on an increased number of customer industries to increase transparency and support stakeholder understanding. As a result of this work, the liquidity of Exel Composites Plc's share has clearly improved and the number of shareholders has increased.

This year the evaluation criteria of the Best investor pages on the web-competition focused on the availability of up to date information in addition to criteria such as usability and sustainability. In 2020, the jury of the competition was composed of President and CEO Sari Lounasmeri, Finnish Foundation for Share Promotion, professor Minna Martikainen, editor in chief Jussi Kärki, analyst Jonas Forslund, Finnish Society of Financial Analysts, and private investor Tom Lindström.

### ***Exel Composites in brief***

*Exel Composites, a global technology company headquartered in Finland, is the world's largest manufacturer of pultruded and pull-wound composite solutions. Our global manufacturing, R&D, and sales footprint serves customers across a broad range of industries and applications. With 60 years of composites experience and engineering expertise, we work closely with our customers to design and manufacture high quality composite solutions using carbon fiber, fiberglass, and other high-performance materials. Our composites help reduce weight, improve performance, and decrease total life cycle costs, all while helping increase energy efficiencies and supporting environmental sustainability.*

*Exel Composites employs approximately 650 innovative and customer-focused employees around the world and is listed on the Nasdaq Helsinki exchange. To find out more about our offering and company please visit [www.exelcomposites.com](http://www.exelcomposites.com).*
