

## Modified Statement from Auditors in the Annual Report for 2019

The company's Auditors KPMG AB, have reported to Annual General Meeting in InCoax Networks AB a note of Significant uncertainty factors regarding the assumptions of going concern. The Auditors recommend that the general meeting of shareholders adopts the income statement and balance.

### The Auditors note:

#### *Significant uncertainty factors regarding the assumption of going concern*

Without affecting our statements above, we would like to draw attention to the income statement and balance sheet in the annual report, which shows that the company reports a loss for the financial year. The Board of Directors' report states that the company has identified a risk that the company will not be able to receive adequate funding for the business. Such financing is not secured at the time of submission of the annual report. These conditions indicate that there is a significant uncertainty factor that can lead to significant doubts about the company's ability to continue operations.

The Management team and Board of Directors working are working on a plan to solve the going concern factor by seeking long term financing.
