Detailed regulation for Engebø approved

Today, the Naustdal municipality approved the detailed regulation plan which includes buildings and infrastructure at the processing plant and service areas, as well as for the mining area, access and haul roads etc.

The approval of the detailed regulation plan is an important milestone for the development of the Engebø project and leaves the regulation plan for water supply as the only outstanding approval required to commence construction. A final resolution on water supply is expected in the near future.

Nordic Mining CEO, Ivar S. Fossum, states: "*We are very pleased for the resolution by the Naustdal municipality. The approval underpins Nordic Mining's solutions developed over time for a long-term industrial development in Sunnfjord*."

Nordic Mining ASA

Nordic Mining ASA (www.nordicmining.com)

Nordic Mining ASA ("Nordic Mining" or the "Company") is a resource company with focus on high-end industrial minerals and metals. The Company's project portfolio is of high international standard and holds significant economic potential. The Company's assets are in the Nordic region.

Nordic Mining is undertaking a large-scale project development at Engebø on the west coast of Norway where the Company has rights and permits to a substantial eclogite deposit with rutile and garnet. Nordic Mining also holds 18.5% of the shares in Keliber Oy, which is developing a lithium project in Finland to become the first European producer of battery grade lithium hydroxide.

In addition, Nordic Mining holds interests in other initiatives at various stages of development. This includes patented rights for a new technology for production of alumina, and exploration of seabed minerals, high-purity quartz, nickel and PGE.

Nordic Mining is listed on Oslo Axess with ticker symbol "NOM".
