NextCell presents their latest phase II clinical data at ISCT 2021

NextCell Pharma AB (“NextCell”) announces today that they will present their findings from their Phase I/II study entitled “Wharton’s Jelly Derived Mesenchymal Stromal Cell Treatment of Adult Patients Diagnosed With Type I Diabetes” (NCT 03406585) at the International Society of Cell and Gene Therapy virtual conference 2021 (May 26th-28th).

NextCell’s CSO, Dr. Lindsay Davies will attend the meeting and present a poster entitled “Protrans Wharton’s Jelly Mesenchymal Stromal Cells Preserve Beta Cell Function in Newly Diagnosed Type I Diabetes Patients – A Randomised, Double-Blinded, Placebo Controlled Phase II Trial” (Poster #111).

NextCell, in collaboration with the Principal Investigator for the trial, Prof. Per-Ola Carlsson of Uppsala University Hospital, outline their study findings highlighting the therapeutic effect of a single infusion of ProTrans in maintaining beta cell function in early diagnosed, adult type I diabetics.

Dr Mathias Svahn, CEO of NextCell commented, “We are extremely happy to share the data from our latest Phase I/II trial in type I diabetic patients using our mesenchymal stromal cell drug candidate, ProTrans. It is an honour for us to be selected to share these data at the ISCT meeting this year.”

NextCell are actively involved in the ISCT. Dr Lindsay Davies is a member of the Commercialisation Committee, Process and Product Development Committee and the Particulate Working Group. Dr Davies is also a mentor for Early Stage Professionals in Cell Therapy for ISCT Europe. Dr Mathias Svahn is a member of the ISCT’s Business Models and Investment Committee.
