Inhalation Sciences receives new IRS orders worth EUR 52,000 from global pharmaceutical companies

Inhalation Sciences Sweden AB (publ) has received several new Inhalation Research Service (IRS) orders from recurring global pharmaceutical companies with a total value of approximately EUR 52,000 (approximately SEK 554,000).

The orders relate to the company's technology platform PreciseInhale® and DissolvIt® designed to deliver controlled and high-precision inhalation exposures for preclinical research.

"These orders confirm a continued strong interest in our technology from our existing customer base and leading pharmaceutical companies", says Manoush Masarrat, CEO of Inhalation Sciences.

"We see increased client activity as more companies discover the benefits of our unique technology platform, particularly considering a changing regulatory landscape where more precise, efficient and cost-effective inhalation testing methods are needed. Our solutions enable significant time and cost savings while improving data quality, which is becoming increasingly important for drug development."
