**Cimco Marine AB** (publ) has, after several years of development, constructed the OXE Diesel, the world's first diesel outboard engine in the high power segment. OXE Diesel has a unique belt driven propulsion system that allows a hydraulic multi-friction gearbox to be mounted. This means that the engine can handle significantly higher loads than a traditional outboard engine. Cimco's OXE Diesel has a horizontally mounted engine as opposed to a traditional outboard with a vertically mounted engine.
