Artificial Solutions further expands its Conversational AI platform reach to 86 languages

Artificial Solutions today announced support for two additional languages, Korean and Albanian, to the already supported 84 languages, further expanding the company's global footprint.

With the company's built-in language support covering close to 40% of the world's population, the Conversational AI platform can deliver assistance in multiple languages to audiences worldwide.

Artificial Solutions provides the most extensive conversational AI language solution in the market.

"Our technology can deliver solutions in languages that haven't been catered to before, and our approach is to continue localizing top-level solutions to eliminate the need to rebuild bots whenever an enterprise wants to expand its reach", said Andreas Wieweg, CTO at Artificial Solutions.

The two additional languages, Albanian and Korean, are now added to an extensive catalogue that include - Afrikaans, Amharic, Armenian, Azerbaijani, Basque, Belarusian, Bengali, Bosnian, Bulgarian, Catalan, Chinese (Mandarin), Croatian, Czech, Danish, Dutch, English, Esperanto, Estonian, Ewe, Faroese, Finnish, French, Galician, German, Greek, Georgian, Gujarati, Hindi, Hungarian, Icelandic, Indonesian, Italian, Igbo, Irish, Japanese, Latvian, Kazakh, Kinyarwanda, Kirundi, Kyrgyz, Lithuanian, Luxembourgish, Macedonian, Malay, Malagasy, Maltese, Marathi, Mongolian, Nepali, Norwegian, Odia, Oromo, Papiamento, Polish, Portuguese, Quechuan, Romansh, Romanian, Russian, Sámi, Sango, Scottish Gaelic, Shona, Sinhala, Somali, Swahili, Swazi, Serbian, Slovak, Slovene, Spanish, Swedish, Turkish, Tigrinya, Tsonga, Tswana, Turkmen, Ukrainian, Uzbek, Vietnamese, Welsh, West Frisian, Yoruba and Zulu.

The platform also caters for regional differences and different writing scripts. Examples of this include the different spelling variations between UK and US English, the differences in vocabulary and grammar for Brazilian and European Portuguese, and the different Japanese writing systems.

About Artificial Solutions

Artificial Solutions® (SSME:ASAI) is the leading specialist in Conversational AI. We enable communication with applications, websites and devices in everyday, humanlike natural language via voice, text, touch or gesture input.

Artificial Solutions' advanced conversational AI Teneo®, allows business users and developers to create sophisticated, highly intelligent applications that run across 86 languages and dialects, multiple platforms and channels in record time. The ability to analyse and make use of the enormous quantities of conversational data is fully integrated within Teneo, delivering unprecedented levels of data insight that reveal what customers are truly thinking.

Artificial Solutions' conversational AI technology makes it easy to implement a wide range of natural language applications such as virtual assistants, conversational bots, speech-based conversational UIs for smart devices and more. It is already used daily by millions of people across hundreds of private and public sector deployments worldwide.
