BiBB Receives Green Light for Its Second US Patent

BiBBInstruments AB ("BiBB" or the "Company"), developer of EndoDrill® – the world's first market-cleared powered biopsy instrument for endoscopy – today announces that it has received a Notice of Allowance from the United States Patent and Trademark Office (USPTO) for its second US patent application covering the EndoDrill® technology. The notice confirms that the USPTO has allowed the application within patent family 3 to proceed to issuance. Once the remaining formalities have been completed, the patent is expected to be issued, providing protection for the technology until 2041.

BiBB has received a Notice of Allowance for its US patent application 17/917,614 within patent family 3. The patent is expected to provide additional protection for the EndoDrill® product family in the US market. The Company has three international patent families covering EndoDrill®, with patent applications in the national or regional phase and granted patents in the US, Europe, Japan, India and China. The Company continues to pursue additional patent applications to establish broad and long-term protection for EndoDrill®, the world's first powered biopsy system for endoscopic ultrasound.

"We are very pleased to have received the green light for our second patent in the US. This strengthens our long-term patent protection in a strategically important market where we have initiated the commercialization of our first biopsy instrument, EndoDrill® GI," says Fredrik Lindblad, CEO of BiBB.

About BiBBInstruments AB
BiBBInstruments AB is a cancer diagnostics company that develops and manufactures EndoDrill®, the world's first product family of market-cleared powered biopsy instruments for endoscopy. EndoDrill® enables the collection of intact tissue cores for histopathological and molecular analysis, aiming to improve cancer diagnostics. The product portfolio includes EndoDrill® GI, EndoDrill® EBUS and EndoDrill® URO, all CE-marked under the EU MDR, with EndoDrill® GI also FDA-cleared. Commercialization of EndoDrill® GI is underway in the US and Europe through distribution partners. BiBB is headquartered at Medicon Village in Lund, Sweden, and is listed on Spotlight Stock Market (ticker: BIBB).
