Cabonline awarded major school transport contracts in Trondheim and Malvik

Cabonline has been awarded three new school transport contracts by AtB AS in Trondheim and Malvik, strengthening its position in the region and expanding its role in essential public transport services.

The contracts will commence on 1 August 2026 and run until 2029, with options for extension. The award follows a public procurement process, where bids were evaluated based on both price and quality, with particular emphasis on the ability to deliver safe and reliable school transport. The company already operates in the area and sees the new agreements as an important step in further strengthening its local presence in Trondheim.

– We are very proud of the trust placed in us by AtB. Providing school transport is an important responsibility – it is about ensuring safe, reliable journeys and a good start to the day for the children who depend on these services. We look forward to becoming part of everyday life for pupils and families in Trondheim and Malvik, says Erik Moberg, Head of B2P and B2B Solutions at Cabonline Group.

The new contracts cover large parts of Trondheim and Malvik and will result in an increased number of assignments for Cabonline's affiliated transporters and drivers in the region.

– This award creates more assignments for our transporters and drivers and contributes to a safer, more predictable working day. This is important to us and a key part of how we develop our operations in Trondheim, says Per Gunnar Hybertsen, Regional Manager at Cabonline Norway AS.
