## Cabonline has signed school transport agreement with the City of Stockholm

**Cabonline has signed an agreement with the City of Stockholm for school transport services. Parts of the agreement have already entered into force, while additional contract areas will commence on 3 October 2026.**

– This is an important assignment with high requirements for quality, planning and reliability. We are pleased with the continued trust from the City of Stockholm and look forward to continuing to deliver safe and accessible journeys across the city, says Erik Moberg, Head of B2P Cabonline, Cabonline Group.

Three out of five contract areas were awarded following a public procurement process in which Cabonline was selected based on a combination of quality and competitive pricing. The assignment includes school transport, transport to daily activity services, as well as journeys for elderly and adult passengers, and requires extensive operational coordination in a complex metropolitan environment with high traffic volumes and strict punctuality requirements.

– Delivering these journeys is a socially important responsibility that requires both structure and high delivery reliability in day-to-day operations. The agreement strengthens Cabonline's position within publicly procured transport services and creates long-term conditions for affiliated transporters and drivers in the Stockholm region, says Daniel Lindström, operations manager Cabonline Sweden.

The City of Stockholm is already a customer of Cabonline and the agreement represents a continued long-term collaboration. The agreement is one of Cabonline's largest within publicly procured transport services.
