## ***The popular Terhi 480 family grows with a third member***

**Stylish novelty Terhi 480 TC fills the gap left by favorite model Terhi 475 Twin C.**

For season 2020 Terhi launched two new models 480 BR and 480 Sport. For upcoming season 2021, Terhi 480 family gets a third member.

Terhi 480 TC is a 4,8 meters long motorboat with two consoles. Boat has ample storage compartments, stylish looks, and great driving characteristics. Boat fits up to five adults. Steering takes place from boat's backseat. This enables placing consoles in stern, which leaves the bow open and roomy. In front of the consoles there are storage compartments that double as seats. There is also a seat in the bow that has as an spacious compartment inside.

The former version of the 480 TC, 475 Twin C was Finland's most sold boat package on its launching year. The model became fast favorite boat among fishers and summer house owners. "When updating the model, we paid attention on feedback gotten from boaters, maintaining the best features and refining the boat to be even better" comments Terhi product manager Jussi Virtanen. "For example, there is more space for gauge, chart plotters and music players on the steering console."

**FINLAND**

Boat's hull is made from ABS plastic with a three-layer structure. The unique construction of Terhi boats guarantee besides unsinkability, also quiet rides even in rough weather. The space in between the thermo-formed ABS-plastic hull and deck section is filled with non-water-absorbent polyurethane foam. The result is a solid and stiff sandwich construction, which is easy to maintain and quiet in use.

In addition to the boat's comprehensive range of standard equipment, there is also a wide range of accessories. Boat can be equipped with a stern canopy, which has its own storage compartment behind the stern bench. Open bow can be equipped with a roomy sun bed for hot summer days. The sunbed platform doubles also as a fishing platform. Increasing safety, the boat can be equipped with rails made from stainless steel.

---

The Terhi boats are manufactured by TerhiTec Oy, a company located in the small fishing village of Rymättylä in Southwest of Finland. Since being founded in 1972 the company has produced over 230 000 boats, and is one of the leading boat manufacturers in Europe. TerhiTec also owns a factory in the city of Ähtäri, Finland, where the high quality Silver aluminium boats are made. Still today all boats produced by TerhiTec are proudly made in Finland.

TerhiTec Oy is part of the Otto Brandt Group, a Finnish family-owned company which was founded back in 1905. The concern includes Oy Brandt Ab, importer of Honda outboards, -motorcycles, -ATVs and Bike & Boat World, which is the biggest Finnish reseller chain of motorcycles, ATVs and boats.
