

Terhi times three

NEW BOAT MODELS FROM FINNISH TERHI ABS BOATS

Terhi introduces three new boat models for the 2026 season, designed to offer safe, easy and practical solutions for leisure boating. The new Terhi 400 CC, 450 TC and 480 CC models provide different sized options for a varied use, without compromising on stability, durability and ease of handling that traditionally characterize Terhi boats.

All novelties share the same robust and safe ABS plastic sandwich construction, which is densely filled with water non-absorbing polyurethane foam. Terhi's unique hull structure makes the boats practically unsinkable. The new models are well suited as multi-purpose boats for the summer home or cottage, for transports and commuting, as well as for fishing and leisurely day trips.

Terhi 400 CC - Small in size, great in versatility

Terhi 400 CC is a nimble open boat with a centre console, offering impressive performance and stability in a compact format. The transom is designed for outboard engines up to 20 hp, which provides responsive yet easy and safe handling.

The 400 CC is an excellent choice for transport duties, fishing or as a capable base for junior boaters with growing needs. The centre console ensures good visibility and easy movement on board, while the lightweight hull makes the boat easy to handle both on a trailer and at the shore.

Technical data:

Length.....	400 cm
Width	180 cm
Dry weight.....	approx. 155 kg
Capacity	4 persons
CE design category.....	C
Recommended engine	20 hp

Terhi's unique hull structure makes the boats practically unsinkable.

Terhi 450 TC - Increased protection and practicality

The Terhi 450 range is expanded with the new TC version featuring a twin-console layout that offers improved protection for day trips and cottage transports. A two-piece door between the consoles further enhances wind shelter. In front of the consoles, there is ample space for safe cargo transport or fishing.

Spacious, stable and practical, the 450 TC is particularly well suited for families and couples, who need a nimble and easy-handles motorboat for day trips, transport tasks and commuting. High freeboards and predictable handling contribute to safe and comfortable boating.

Technical data:

Length.....	450 cm
Width	185 cm
Dry weight.....	approx. 335 kg
Capacity	5 persons
CE design category.....	C
Recommended engine	40 hp

Terhi 480 CC - A versatile centre console boat for active leisure use

The Terhi 480 CC is a spacious and practical open boat with a centre console, based on the existing 480 hull. Unlike other versions in the range, the 480 CC features a stylish grey hull. The generous open deck areas makes for excellent working space and facilitate easy movement on board.

The boat is especially suited for fishing, transporting people and cargo, day trips and general leisure boating. The stable hull and high freeboards enhance safety and comfort in varying conditions.

Technical data:

Length.....	480 cm
Width	185 cm
Dry weight.....	approx. 350 kg
Capacity	5 persons
CE design category.....	C
Recommended engine ...	40-60 hp

Shared benefits of the novelties:

- Stable, safe and practically unsinkable construction
- Easy to handle and comfortable to operate
- Designed for versatile use, from transport and commuting to leisure boating and fishing
- Proven Terhi quality, designed and manufactured in Finland
- Wide range of optional equipment
