

## **Chairman Rune Löderup acquires 1,816,244 shares in GoldBlue AB and receives lent shares in return**

"The reason for my share purchase is that the share is extremely depressed and does not reflect at all the underlying asset value in the company. The stock market does not seem to understand or price GoldBlue's future growth opportunities or value of the assets the company has.

There has also been speculation about the equity loans I and Board member Staffan Lindgren have given to Recall Capital. This was done to have room for a reserve funding for the company. However, Recall Capital has not had to sell shares to borrow capital for GoldBlue, since the funding was recently secured with a bridge loan of SEK 3.5 million. Therefore, Recall Capital has now returned the borrowed shares, says Rune Löderup, Chairman of GoldBlue AB.
