

Solution International achieves outstanding result in BRCGS Consumer Goods audits

Stockholm - 2025-11-26

Following two recent audits assessing the company's standards in product safety, quality, and traceability of consumer goods, the business is delighted to have achieved the highest possible scores for a consecutive year running.

These results further underpin the company's ongoing commitment to global compliance, operational excellence, and industry-leading performance. For a second-year running, Solution was scored an **AA** result for the **BRCGS Agents & Brokers** announced audit. A global standard, designed to effectively manage the product safety, authenticity, quality and legality for businesses that sell products but do not manufacture in their own facilities or online sites.

Widely recognised by retailers - *who influence and assess the capabilities of their suppliers*¹ - this certification reassures them that fundamental requirements are met within a strict framework; to eliminate risk and ensure the traceability of goods sold should this information later be requested by authorities or customer.

A milestone moment for the business followed soon after as Solution achieved the highest score possible in the **BRCGS Storage & Distribution** audit, securing **AA+**.

Marked by the '+' in the score, this is the first audit to be unannounced in three years of being assessed against the criteria set for this standard. Not only is this rating extremely difficult to achieve but it confirms internal systems are controlled and effectively managed day to day as standard practice. With emphasis on the warehouse function, the audit is designed to benchmark a framework for logistics safety, legality and quality for consumer goods working through the supply chain - something many large retailers and businesses expect when collaborating with suppliers.

"These hard to achieve top-tier results reflect our relentless focus on safety, quality, and continuous improvement. As we grow the product SKUs we develop and the categories we operate in, BRCGS certification remains central to delivering products our customers and consumers can trust. The outcome is of course what we all work for but to

get the results we strive for, it takes the whole team to have a 'right first time' mentality which is a culture we are very proud to foster within the business".

- Wendy Wastie, Technical & Audit Manager at Solution International.

About BRCGS

BRCGS stands for Brand Reputation through Compliance Global Standards. Formerly known as the British Retail Consortium (BRC), it is a leading global organisation that sets standards for food safety and other consumer products. The certification ensures that manufacturers meet rigorous quality, safety, and operational criteria, and it is often a requirement for suppliers to leading retailers. A '+' within the grading marks the fact the audit is unannounced.
