

Bio-Works receives order for WorkBeads™ affimAb valued at approximately SEK 8.3 million

Bio-Works Technologies AB today announces that the company has received an order from a returning customer in Europe for **69 liters of WorkBeads™ affimAb**, valued at approximately **SEK 8.3 million**. Deliveries are scheduled for the **first and second quarters of 2026**.

The order confirms continued trust from the customer and underscores Bio-Works' strong position as a supplier of high-quality chromatography products to the biotechnology and biopharmaceutical industries.

"Receiving this repeat order from an established customer is clear proof that our products deliver on quality and performance. We are proud to continue contributing to our customers' success in the development and production of biological drugs," says **Lone Poulsen Carlbom, CEO of Bio-Works**.

WorkBeads™ affimAb is a chromatography medium developed for the purification of monoclonal antibodies (mAbs) and other protein-based drugs, where high affinity and robust performance are critical.
