

Intrasenze enables investments in local and global safety at FundedByMe

Intrasenze is the innovation company behind the personal safety app UAN-safe. Now they are launching their crowdfunding campaign at FundedByMe. Anyone can now invest in Intrasenze - the company with a vision to build a safer and more resource efficient society.

— Our hope is that many people want to join our team in creating a safe and secure society by becoming a partner or investor in Intrasenze, says Tony Fahlström CEO of Intrasenze.

United action Network™ and the related app UAN-safe is a safety-community that has been under development over the last three years. In April 2018 the app was first launched officially. It enables individuals and companies to build networks, both public and private. The networks can then be connected to already existing security and alarm systems. Users of the app can also assist if an emergency or accident occurs and get a notification on their phone if help is needed. The system works wherever you are, and whatever language you speak. It is made to work both locally and internationally.

— Our app helps companies and individuals to increase their safety. The idea is built on the ability to share information in smart networks combined with traditional safety devices such as alarms and cameras. The solution is a cloud-based global emergency centre. We offer everyone a service free of charge, where they can create their own local solutions and communicate with others in private or public networks based on the situation, says Tony Fahlström CEO of Intrasenze.

The basics of the UAN-safety app is free of charge, but if you want to add any other devices (for example alarm sensors or cameras) an extra fee is added to the monthly charge of a maximum 99 SEK. Other security companies can easily use the app as a supplement to their already existing security process. All communication on the app is encrypted to provide safety for all users.

The campaign is now launched at FundedByMe and is open for 45 days with a goal to reach 750 000 - 375 0 000 mSEK in invested means.
