

Press release Smoltek Nanotech Holding AB (publ)

2026-04-28

This press release is an English version of the previously published Swedish version, which has interpretive precedence.

Smoltek visits Taiwan for meetings with industrial partners and participation in Yageo Group AI Summit

Smoltek Nanotech Holding AB (publ) (“Smoltek” or the “Company”) announces that its subsidiary Smoltek Semi is intensifying its work in the Asian market through a visit to Taiwan. The company’s CEO, Magnus Andersson, will travel to Taiwan in late April–early May to meet with leading industrial players and potential partners in the semiconductor sector.

During the stay, meetings will be held with several key players, including ITRI (Industrial Technology Research Institute), one of Taiwan's most important research institutes in technology and innovation. The focus of the dialogues with various industrial players is how Smoltek's advanced capacitor technology can contribute to stable and efficient power supply in next-generation microchips.

The need for improved power distribution is increasing as the semiconductor industry develops increasingly high-performance and energy-intensive chips, not least in AI, data centers and advanced electronics. Smoltek's technology has the potential to meet these demands through compact capacitor solutions with high performance and integrability.

– Taiwan is a global hub for the semiconductor industry and a strategically important market for us. Through dialogue with leading players on site, we are strengthening our position and exploring concrete opportunities for future collaborations, says Magnus Andersson, CEO of Smoltek Semi.

Smoltek has also been invited to attend the Yageo Group AI Summit in Taipei on April 30th, where the company will have the opportunity to make further connections within the rapidly growing AI ecosystem. The visit highlights the company's ambition to become a key technology partner for future semiconductor solutions.

Smoltek Nanotech Holding is a public technology company that provides a technology that enables the production of conductive nanostructures on various materials. The company's technology multiplies the actual surface area for electrical and chemical processes and can be used in several industrial sectors. Customers are found in semiconductors and the global process industry. The products that the company develops are used as infrastructure components for stable power supply to microchips as well as electrodes and coating of surface structures in applications for the production and use of fossil-free hydrogen. The company protects its carbon nanotechnology through an extensive patent portfolio. Smoltek's share is listed on the Spotlight Stock Market under the ticker symbol SMOL. Smoltek is a development company and forward-looking statements regarding time to market, production volume and price levels should be interpreted as forecasts and not commitments.
