

Smoltek applies for listing change to Nordic Growth Market – NGM

This press release is an English version of the previously published Swedish version, which has interpretive precedence.

Smoltek Nanotech Holding AB (publ) (“Smoltek” or “the Company”) announces its application for listing change. During the year, the Board of Directors and management have conducted a thorough evaluation of various marketplaces. Following this evaluation, the Board has decided to apply for a listing on the Nordic Growth Market (NGM), part of the Boerse Stuttgart Group, which is considered the best pathway to the European capital market. The goal is to complete the listing switch before the end of the fourth quarter of 2026. Subsequently, the aim is to apply for a parallel listing on Boerse Stuttgart during the same quarter to strengthen the Company's presence in the European capital market and facilitate trading in the Company's shares for European investors.

Smoltek plans to apply for delisting from Spotlight Stock Market after receiving approval from NGM. Trading in all Smoltek's financial instruments will then commence on NGM immediately after the final day of trading on Spotlight.

“We are seeing strong interest in Smoltek's technologies and upcoming products in Central Europe, where there is also significant investor interest. We believe that NGM, through its connection to Boerse Stuttgart, is best positioned to help us address this interest and make the stock more accessible to European investors. At the same time, the change of listing offers us significant cost advantages and increased visibility, in line with our ambition to create long-term shareholder value,” comments Oskar Säfström, Acting CEO and President of Smoltek Nanotech Holding AB.

Smoltek Nanotech Holding is a public technology company that provides a technology that enables the production of conductive nanostructures on various materials. The company's technology multiplies the actual surface area for electrical and chemical processes and can be used in several industrial sectors. Customers are found in semiconductors and the global process industry. The products that the company develops are used as infrastructure components for stable power supply to microchips as well as electrodes and coating of surface structures in applications for the production and use of fossil-free hydrogen. The company protects its carbon nanotechnology through an extensive patent portfolio. Smoltek's share is listed on the Spotlight Stock Market under the ticker symbol SMOL. Smoltek is a development company and forward-looking statements regarding time to market, production volume and price levels should be interpreted as forecasts and not commitments.

This disclosure contains information that Smoltek Nanotech Holding AB is obliged to make public pursuant to the EU Market Abuse Regulation (EU nr 596/2014). The information was submitted for publication, through the agency of the contact person, on 07-10-2026 14:47 CET.
