Smoltek Nanotech Holding is a public technology company that provides a technology that enables the production of conductive nanostructures on various materials. The company's technology multiplies the actual surface area for electrical and chemical processes and can be used in several industrial sectors. Customers are found in semiconductors and the global process industry. The products that the company develops are used as infrastructure components for stable power supply microchips and as electrodes and surface structures in equipment for the production and use of fossil-free hydrogen. The company protects its unique carbon nanotechnology through an extensive patent portfolio. Smoltek's shares are listed on the Nordic Growth Market (NGM) under the ticker symbol SMOL. Smoltek is a development company and forward-looking statements regarding time to market, production volume and price levels should be interpreted as forecasts and not commitments.
