

## OptiMobile AB (publ) and Emblasoft Systems collaborate

**OptiMobile and Emblasoft Systems join forces to create solutions that address a growing demand from operators to rapidly enable VoLTE and VoWiFi devices in IMS core networks.**

OptiMobile and Emblasoft Systems have identified a need for accurate and cost-effective device provisioning to facilitate users access to critical functionalities like VoLTE and VoWiFi in next generation IMS systems. A key market driver for these solutions is that operators around the world are initiating the shutdown of 2G and 3G networks, in favor of 4G and 5G.

### CEO Erik Nilsson comments:

*"We are excited to be working with Emblasoft Systems to find the optimum solutions for a smooth transition of voice services for our operator customers during their network shifts."*

**Emblasoft:** *We are passionate about building software products that enable our customers to innovate and drive the evolution of the communications industry. We are a global provider of Service Enablement, Performance Management and Test and Verification systems for VoLTE, IMS and 5G infrastructure. With Emblasoft's solutions, CSPs and equipment manufacturers can obtain and deliver new products and services that are at the forefront of technology.*

*We're a new name in the market, but we already have more than 35 years of experience, built under the Polystar brand. We changed our name to Emblasoft following our divestiture of Polystar OSIX to Elisa in 2019. Emblasoft's headquarters is in Stockholm, Sweden. For more information, please visit [www.emblasoft.com](http://www.emblasoft.com)*

**OptiMobile** *operates in the field of telecommunication and currently offers various software-based solutions. The services combine traditional telephony with modern technology utilising the Internet and Wi-Fi-networks for various telephony services. Today, collaboration is taking place with a number of telecom operators in the Nordic region, as well as internationally. The head office is located in Stockholm.
