

Flexion Mobile Plc announces issue of US patent

Company is awarded patent for key aspects of its core technology in the US

London, 16th of November, 2018 - Flexion Mobile Plc ("NASDAQ:FLEXM"), the London-based company that helps game developers maximise the growth potential of their Android games, today announced that the USPTO has issued patent no 10,127,035.

The patent - SYSTEM AND METHOD TO MODIFY RUN-TIME BEHAVIOR OF AN APPLICATION BY MODIFICATION OF MACHINEREADABLE INSTRUCTIONS - covers integral aspects of the technology that powers Flexion's service offering.

Jens Lauritzson, CEO of Flexion Mobile, commented:

"We are proud to announce the publication of our first US patent. Our service proposition is unique, as is the enabling technology that powers it. This patent reinforces that view and is a natural step in our journey to develop and protect innovative technology. We are already pursuing protection in Europe and Hong Kong and we intend to expand this further to all core markets where feasible"

Flexion makes it easy for Android developers to maximise the growth potential of their games and offers a distribution platform. Its unique technology has solved a distribution problem for developers. At the core of Flexion's patent pending technology is the enabling and enhancement software that lets developers distribute one version of their game in multiple channels. As a result, game developers can reach new channels without having to make any changes to the game code. Flexion is integrated with global stores such as Amazon and Samsung and leading regional distribution channels in India, South Korea and Japan. Flexion Mobile Plc is listed on Nasdaq First North, Shortname: FLEXM. Certified Adviser is FNCA Sweden AB.
