Recent Publication: FabRICATOR for QC Applications

FabRICATOR was described in a recent paper by Merck Research Laboratories for domain characterization of therapeutic antibody products. IgG1, IgG2, IgG4 and Fc-fusion proteins were investigated using FabRICATOR domain analytics.

The authors conclude that FabRICATOR digestion followed by QC-compatible methods such as RP-HPLC, cIEF and glycan mapping enables identity tests, routine testing and screening of a large number of therapeutic candidates at various stages during development, production and quality control of mAbs and Fc-fusion proteins

FabRICATOR Validation Kit Now Available

The FabRICATOR Validation Kit contains three lots of enzyme to make method validation easier. An extended certificate of analysis is included with each kit.

Product ID	Description
A0-AF4-060	3x2000 Units

[Find out more about the Validation Kit at www.genovis.com](http://www.genovis.com)

Meet us at ASMS

Meet us at 62nd ASMS Conference on Mass Spectrometry and Allied Topics, June 15-19 in Baltimore, Booth #126

To book a meeting with our scientist, please send a mail to info@genovis.com.

Online Store Opening

SmartEnzymes

Very soon you will be able to place the order directly at our web site and accept payment with all major credit cards or PayPal account. We always ship express for fast delivery.

Updated Instructions

All instructions for FabRICATOR, FragIT and FragIT Kit has been updated.

We have changed the recommended cleavage buffer slightly, added a list with compatible buffers and updated the list of product references.

For FragIT Kit we have added instructions on how to elute Fc Fragments.

The instructions are available for download under "documents" on each product page: www.genovis.com
