SDC vælger PORTMAN fra Vitec

27. oktober 2017

Pressemeddelelse

Vitec har indgået aftale med SDC omkring udskiftning af SDCs nuværende porteføljestyringssystem. SDC-bankerne vil derfor tage Vitecs porteføljestyringssystem PORTMAN i brug, suppleret med rådgivningsløsningen COCKPIT. Løsningen vil samlet give lige knap 2.000 rådgivere overblik over slutkunders investeringer, og understøtte SDC-bankernes porteføljestyring og kunderapportering indenfor investeringsområdet.

SDC har vurderet at Vitecs løsninger matcher de behov SDC har til et system, hvorved man kan håndtere forskelligartede aktivtyper, lave løbende rebalanceringer og attraktiv kunderapportering. Et vigtigt parameter i valget er den indbyggede MiFID II-løsning samt TWR beregningsmetoden.

Vitecs produkt PORTMAN baserer sig på en markedskonform platform, med muligheden for at tilføje forskellige moduler i takt med at behov og krav løbende ændrer sig i et dynamisk marked.

- *Vi har valgt PORTMAN fra Vitec, fordi det giver os en omkostningseffektiv, simpel og moderne løsning, fra en stærk nordisk leverandør, udtaler Mikkel Kallerup Olsen, Development Director SDC.*
- *Det er med en god blanding af stolthed og ydmyghed at vi har underskrevet denne aftale med SDC. SDC er en strategisk vigtig partner for os, der med et stærkt professionelt fodafttryk i den finansielle branche i Norden matcher Vitecs strategi fuldstændigt, samtidigt har vi i processen oplevet en rigtig god kemi mellem vore virksomheder. Jeg er sikker på at vi i fællesskab kan sikre succes for SDC's kunder i mange år, udtaler Kim Møller Jensen, CEO Vitec Finans & Forsikring i Danmark.*

SDC – Powering great banking experiences

SDC er en kundejet nordisk datacentral, der dagligt servicerer 120 små og store pengeinstitutter fra hele Norden. SDC har dyrket fællesskabet om en nordisk IT-plattform i mere end 50 år, og servicerer kunder i Danmark, Norge, Sverige og på Færøerne.

SDC chooses PORTMAN from Vitec

27. oktober 2017

Press Release

Vitec has entered into agreement with SDC, that SDC will replace its current portfolio management software. The SDC-banks will commence the use of Vitec's portfolio management software product PORTMAN, in addition with the investment advisor solution COCKPIT. The solution will provide almost 2.000 investment advisors with an overview of customer's investments, and support the SDC-banks portfolio management and client reporting within the investment area.

SDC found that Vitec's products matches the needs SDC has for a cross asset system, capable of supporting continuous portfolio rebalancing and providing an attractive solution for client reporting. An important parameter in choosing the PORTMAN solution is the integrated support of MiFID II, as well as the calculation method of TWR.

Vitec product PORTMAN is based on a standardized platform, with the possibility to adapt different individual modules, as needs and demands changes in a dynamic capital market.

- *We decided to use PORTMAN from Vitec, as it provides us with a cost-effective, simple and modern solution from a strong Nordic supplier, says Mikkel Kallerup Olsen, Development Director SDC.*
- *It is with a mix of pride and humility, that we have signed this agreement with SDC. SDC is a strategically important partner to us, as they with a strong and professional footprint in the Nordic financial sector matches Vitec's business strategy completely. Moreover, we experienced a good cultural match between our businesses during the process of finalising the agreement. I feel confident, that our collaboration will support the success for the clients of SDC in many years to come, says Kim Møller Jensen, CEO Vitec Finance & Insurance in Denmark.*

SDC A/S – Powering great banking experiences

SDC is a customer owned Nordic datacenter, which in a daily basis serves 120 small and large banks in all the Nordic countries. SDC has lived the community for a joint Nordic IT-platform for more than 50 years, with clients in Denmark, Norway, Sweden and on the Faroe Islands.
