Vitec wins FSHS (Finnish Student Health Service) patient information system tender

FSHS has decided to order a patient information system deployed by Vitec Acute Oy. The system will cover the main operations of FSHS including scheduling, patient information and billing. For the deal, which is for seven years and is expected to exceed the amount of 4 million euro, there is a 21-day complaints period after which the contract will be finally signed.

In the center of modern day medicine is patient centric service and information. Vitec delivers by SaaS patient information system that covers most of modern day out-patient clinics activities. FSHS' focus was to found a system and provider that is integratable and comprehensive. Vitec will develop several new value-adding features into its existing Acute-system and integrate to several third party services.

– "This is one of the biggest single deals for our Acute-system. With FSHS we will be able to develop our services to a new level that will help us to gain new markets." says Ilari Laaksonen, Vitec's director for healthcare within Vitec.

Finnish Student Health Service

The Finnish Student Health Service (FSHS) provides general, mental and oral health care services for students of universities and other institutions of higher education in Finland. The purpose of their health promotion work is to get students to assume responsibility for their own health. FSHS encourage healthy lifestyles and physical exercise.

Vitec – Business Area Health

Business unit Health offers via SaaS, a comprehensive patient information system. The system supports the main key processes for health care and has many integrations to a number of third party products. The ERP system is used in a variety of healthcare segments in Finland. In addition to the basic system Vitec Acute also offers SaaS-based solutions for physiotherapy tests and physiotherapy.
