

## **Ranplan appoints Jon Ullmark as Chief Strategy Officer**

**Ranplan Group AB has recruited Jon Ullmark, a specialist in the field of IoT and Automation, for the newly created position as Chief Strategy Officer and member of the Senior Management Team.**

Effective 1 September 2019, Jon joins Ranplan from Hoylu where he was Deputy CEO and General Manager for EMEA. Prior thereto, Jon has held leadership roles within Semcon (Area Manager), C Security Systems (CEO), and Pilotfish Marine (Acting CEO).

"A recognised expert tasked with the commercialisation of Artificial Intelligence, Machine Learning and Automation, Jon comes on board at a defining moment for the Company at large. We are now most evidently taking steps in the development of our organisation to help our customers unleash the full potential of 5G, one characterised by cloud-native solutions, open interfaces, and embedded intelligence, paving the way for the complete integration of our state-of-the-art components within the realm of customers' network managing systems" said Per Lindberg, interim CEO of Ranplan Group AB.

### **Certified Adviser**

FNCA Sweden AB, +46(0)8-528 00 399 [info@fnca.se](mailto:info@fnca.se), is the Company's Certified Adviser at Nasdaq First North

### **About Ranplan Wireless**

Ranplan Wireless is an innovative wireless technology company that has developed the world's only solution that can plan, design and optimise inbuilding and outdoor wireless networks in coordination. Our solutions enable us to help an ecosystem of companies deploy the next generation of wireless networks for a range of applications in urban environments, supporting multiple technologies such as 4G LTE, 5G, Wifi and IoT, providing end users with an unmatched quality of experience.

Ranplan Wireless is a subsidiary of Ranplan Group AB (Nasdaq First North: RPLAN) whose head office is in Stockholm, Sweden. The group operates out of offices in the UK, US and China.

Designing and planning 5G networks presents a variety of technical challenges; in particular, how to design for short range, high frequencies that can still cope with demanding indoor and outdoor coverage and high capacity levels. Ranplan's solution is an all-in-one, heterogeneous network planning, optimisation and simulation tool for Small Cells, DAS and Wi-Fi, supporting 3G, 4G/LTE, CBRS, 5G and IoT technologies. The platform offers users a true 3D ray-tracing model covering frequency bands from 100MHz up to 100GHz, supporting 5G, Massive MIMO, 3D beamforming and mmWave technologies.
