

Ranplan partners with China Unicom Network Technology Research Institute

Cambridge UK, 6 Jan 2020

Following a comprehensive and extensive commercial and technical evaluation, the Network Technology Research Institute of China Unicom - one of the world's largest operators with more than a quarter of a billion active mobile subscribers - has chosen Ranplan as a preferred supplier of indoor radio design tools. An initial purchase order in the region of USD 400k is expected to be revenue recognised before the end of calendar 2020.

"We are very proud to have won the trust of one of world's largest mobile operators at a critical junction in the transition from 4G to 5G, one characterised by an increased emphasis on cellular indoor mobility in close coordination with that of the outdoor. It is our hope that China Unicom, as well as its ecosystem partners, will benefit from our suite of software that not only help perfect the initial deployment of radio nodes but also their subsequent performance within day-to-day operations, remarked Per Lindberg, interim CEO of Ranplan Group AB.
