

Calmark receives order from Triolab Finland - clarification

Clarification: Calmark Sweden AB's press release from today at 14:00 regarding order from Triolab Finland is of strategic importance as it shows that Calmark's distributor has now started demonstrations and active sales work. The economic value of the order is of minor importance.

This information is information that Calmark Sweden AB is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact person set out above, on 9 October 2020, 15:30 CEST.

Every care has been taken in the translation of this document. In the event of discrepancies, the Swedish original will supersede the English translation.

www.calmark.se

Calmark Sweden AB is a medical technology company developing a point-of-care (POC) analysis method with easier and faster diagnostics of medical conditions in newborns. The unique test platform consists of a reader and single-use products. The first tests are being launched in 2020. WHO expects 1.5 billion children to be born worldwide prior to 2030. In the Western world, the introduction of POC diagnostics is resulting in huge savings and shorter care chains. In less developed healthcare systems, the product will offer decision-making support, which is currently lacking, since the access to hospital laboratories often is limited. Calmark aims to become the global leader in POC diagnostics for newborns and, in the long term, to offer all relevant tests for the first period of life. The B share is listed on the Spotlight Stock Market and is traded under the CALMA B ticker. Read more at www.calmark.se/eng/home.
