

Risk Intelligence A/S and Geollect Limited enter partnership

Risk Intelligence A/S ("Risk Intelligence") and Geollect Limited (Geollect) sign partnership agreement for technical solution development, maritime investigations, and intelligence analysis.

In line with the published strategy 2025, Risk Intelligence is increasingly working with partners who complement the existing capabilities of the company. The partnership with Geollect is a perfect example of this: Both companies already have common clients in the insurance and government space, and Geollect's strength in geospatial analysis and technical digital capability development fits exactly with Risk Intelligence's strengths in analysis, HUMINT and expert witness.

Geollect and Risk Intelligence have already joined forces on several pilot projects, during which an increasing number of areas of potential cooperation were identified. The partnership agreement builds on these insights to create a foundation for future projects. These areas of opportunity range from maritime investigations and intelligence analysis to technical solution development. Some projects within these areas have already been initiated and the two parties will announce more information on these projects separately as they develop.

CEO Cate Gwilliam, Geollect

"Working with Risk Intelligence over the last 12 months has been a pleasure and has proven the value of a combined Geollect and Risk Intelligence offering. We are delighted to make this partnership official and bring the strengths of both sides to existing and future clients across multiple verticals. At Geollect we believe the greatest value is delivered to the client not just through technical solutions, but through human expertise as well. Risk Intelligence and Geollect are aligned in their client-centric values which also means both sides will work hard to bring the highest quality solutions to our clients."

CEO Hans Tino Hansen, Risk Intelligence

"It is a great pleasure to enter this partnership agreement with Geollect, which is the result of discussions over the last year that have identified more and more common areas for cooperation. For Risk Intelligence, the new partnership is a perfect example of execution of the 2025 Strategy with new strong commercial partners. This partnership has the potential of impacting both on the intelligence side and the technical side.

In addition, I am certain that the approach, ethos and values of Geollect fit well with those of Risk Intelligence, and that we can develop this partnership in close collaboration for mutual benefit. With mutual clients, especially within insurance and underwriting as well as government and defence, there is already common ground in the market, and I am very much looking forward to developing it together."

About Geollect

Founded by experienced intelligence professionals from the UK and US, the Geollect team combines academics with advanced geospatial data and intelligence analytic capabilities to deliver intelligence services, platforms, and partnerships. Its technical portfolio involves the collective efforts of an expert network; everyone from academics to intelligence analysts. Geollect brings intelligence to action in the areas of Critical National Infrastructure, Energy, ESG, Government & Defence & Law Enforcement, Litigation and Compliance, and Marine Insurance.

Geollect's Geospatial Intelligence draws on a broad range of open access geospatial data – any information associated with a specific location on earth – everything from storm forecasts to social media posts. Geollect's complementary mix of machine-learning and human experts eliminates any skills gaps and covers any blind spots that result from using AI in isolation. Retaining the human factor delivers a richer picture of what's happening.

About Risk Intelligence

Risk Intelligence is a security risk intelligence provider delivering security threat and risk analysis to clients all over the world via the cloud-based Risk Intelligence System, as well as consulting services. A

large part of Risk Intelligence's clients is maritime, and these clients currently operate more than 15.4% of the global merchant fleet.

With its headquarters in Hellerup (Copenhagen), Denmark, an office in Singapore, and locations in North America, the dedicated staff of Risk Intelligence works in all major time zones to support their clients' operations. Since 2018, the company has been listed on the Spotlight Stock Exchange in Stockholm.

The Risk Intelligence System is a digital security intelligence solution developed in close collaboration with global businesses that are established within the fields of shipping, offshore, oil and gas. The digital solution is designed based on insights directly from customers and their needs as well as Risk Intelligence's experienced security risk analysts and developers' knowledge of intelligence and assessment needs.

The Risk Intelligence System offers clients a complete picture of immediate, short-, and medium-term security risks for coastal areas, ocean, port, and landside threats. The analysis is focused on insurgency, piracy, organised crime, activism, terrorism, military conflicts, and any interplay between these. Risk Intelligence identifies where serious events arise and presents an assessment of how great the threat is in each area, while at the same time providing 24/7/365 situational awareness with incident reports and alerts. This enables companies to evaluate both current and future security risks in real time and to minimise risks across their operations.

Risk Intelligence A/S was founded in 2001 by Hans Tino Hansen. The company has evolved to become a prominent company in security risk management by delivering threat and risk assessments worldwide. Risk Intelligence operates and assists customers and partners from headquarters located north of Copenhagen, the office in Singapore as well as through representatives in Europe, Asia and North America. The business model is designed with international scalability in mind and the company is globally regarded as an expert in its field. Risk Intelligence's core product is the 'Risk Intelligence System (MaRisk + PortRisk + LandRisk)', a digital solution that allows clients to monitor global security risks and enables them to plan and implement missions in risk areas. Risk Intelligence is listed on the Spotlight Stock market [RISK].
