

## Risk Intelligence A/S and NAVTOR partnership reaches milestone with launch of integration into NavStation route planning product

**Risk Intelligence A/S ("Risk Intelligence" or "the Company") and partner NAVTOR announces product launch of integration of Risk Intelligence System data into NAVTOR's NavStation.**

Risk Intelligence's partner NAVTOR has launched a new layer for their NavStation route planning platform with integration of data from the Risk Intelligence System. NavStation is currently used by more than 8,000 vessels operated by NAVTOR clients and a part of these are mutual clients with Risk Intelligence.

This is in line with the objectives of the Risk Intelligence Strategy for partnerships, which seeks to widen and deepen the market. Widening is when Risk Intelligence with partners is addressing market segments that the Company have chosen not to pursue on its own. In this case vessels operated by clients, and potential clients, will now be able to access the maritime security intelligence through their route planning platform. This means the market will be deepened as more users per client will be able to access the product.

### **Hans Tino Hansen, CEO of Risk Intelligence says:**

*"Properly understanding maritime risk requires dedicated sources, resources, constant vigilance, and the ability to view individual issues through the lens of wider context and specialist analysis. Bridge officers, or office-based teams, juggling multiple responsibilities simply cannot do this. To plan and execute a safe voyage you need optimal analysis and support, now more than ever.*

*By integrating our services into NAVTOR's renowned planning platform we can deliver decisive intelligence – leading to truly informed assessments and conclusions – in a simple, seamless and powerful manner. This will help shipping companies worldwide navigate risk with confidence.*

*With this integration of our data, we are fulfilling our strategic decision to partner with high quality partners to widen and deepen our markets. This case is a clear-cut example of deepening the market with a partner. We are delighted with our cooperation and the product launch."*

The revenue from the product integration is expected to impact ARR from Q1 2026.

### **About NAVTOR**

Norway-based NAVTOR is the global leader in e-Navigation, performance and maritime technology, offering a digital ecosystem of innovative products and services to customers around the world. The business, which formed in 2011, now has a network of 13 offices and a team of over 400 expert staff.

### **About Risk Intelligence**

Risk Intelligence is a security risk intelligence provider delivering security threat and risk analysis to clients all over the world via the cloud-based Risk Intelligence System, as well as consulting services. A large part of Risk Intelligence's clients is maritime, and these clients currently operate more than 16% of the global merchant fleet.

With its headquarters in Hellerup (Copenhagen), Denmark, an office in Singapore, and locations in North America, the dedicated staff of Risk Intelligence works in all major time zones to support their clients' operations. Since 2018, the company has been listed on the Spotlight Stock Exchange in Stockholm.

The Risk Intelligence System is a digital security intelligence solution developed in close collaboration with global businesses that are established within the fields of shipping, offshore, oil and gas. The digital solution is designed based on insights directly from customers and their needs as well as Risk

Intelligence's experienced security risk analysts and developers' knowledge of intelligence and assessment needs.

The Risk Intelligence System offers clients a complete picture of immediate, short-, and medium-term security risks for coastal areas, ocean, port, and landside threats. The analysis is focused on insurgency, piracy, organised crime, activism, terrorism, military conflicts, and any interplay between these. Risk Intelligence identifies where serious events arise and presents an assessment of how great the threat is in each area, while at the same time providing 24/7/365 situational awareness with incident reports and alerts. This enables companies to evaluate both current and future security risks in real time and to minimise risks across their operations.

**Disclaimer:**

Risk Intelligence typically uses press releases to announce new clients or significant expansions of existing client contracts, in accordance with the wishes of those clients. However, there may be other business deals that Risk Intelligence chooses not to or cannot disclose through press releases. All deals classified as MAR will always be announced through press releases.
