

The collaboration with Onkos is paving the way for further growth in the US.

The collaboration with Onkos is truly starting to pay off. Not only has Onkos recruited a number of well reputed hospitals (among which Emory Healthcare, USC Keck Medical Center, and Duke Health) to the OPRA™ network, these hospitals are now performing their first surgeries with the OPRA™ Implant System and their respective patient treatment plans, and have new patients in the pipeline.

Despite the ongoing pandemic, and the subsequent current restrictions placed on elective surgery, these first surgeries have been successfully performed, and further treatments scheduled. Integrum is very pleased with the recent progress made by Onkos, and we are very much looking forward to a continued expansion of our collaboration.

About Onkos Surgical

Onkos Surgical was founded in 2015, with a singular focus on bringing innovation to musculoskeletal oncologists and the patients they care for. Built on a digital platform, Onkos is an emerging leader in the field of personalized orthopaedics. With expertise in personalized surgical planning, 3D modeling and the latest advancements in 3D printing, the company has developed a suite of products designed to reduce complexity and address the clinical challenges associated with tumor and complex orthopedic revision surgery.

Today, Onkos Surgical covers the entire US market, with a special focus on leading university hospitals in the orthopaedic oncology field. In Onkos' network there are 115 independent sales representatives serving hospitals across the country.

About Integrum

Integrum AB is a publicly-traded company (INTEG B: Nasdaq First North exchange) based outside of Gothenburg, Sweden, with a US subsidiary in San Francisco, CA. Since 1990, osseointegration, the science behind the OPRA™ Implant System, has been helping individuals with amputations enjoy a dramatically improved quality of life. Thorough surgical experience gained over more than three decades, from 500 surgeries, in 14 countries, has led to the development of Integrum's system for bone-anchored prostheses – a vastly superior alternative to the traditionally used socket prosthesis.

The OPRA™ Implant System is the only FDA approved medical device for above-knee, bone-anchored prosthetics available in the US. More information on the company and its innovative solutions for amputees can be found at www.integrum.se.
