

To increase awareness of the availability of the OPRA™ Implant System among specialists and patients, Integrum launches the “Find a Center” campaign.

Despite more than 30 years of research, development, and excellent clinical outcomes, many amputees and specialists around the world are still unaware of the advantages and availability of treatment with the OPRA™ Implant System. Integrum is therefore now launching the “Find a Center” campaign which will show how broadly established the OPRA™ network is. Today, there are more than 30 centers around the world helping patients to lead more active and productive lives. Please see the map below to see the global availability of the OPRA™ Implant System.

WHERE TO GET THE OPRA™ IMPLANT SYSTEM

The OPRA™ Implant System is available at leading hospitals and medical centers around the world. Contact a hospital or medical center near you in order to schedule a consultation. Since not all centers providing treatment with the OPRA™ Implant System are listed, please contact us directly if you do not find a center located conveniently near you at: www.integrum.se/are-you-a-potential-candidate

The OPRA™ Implant System is currently available in Australia, Austria, Belgium, Chile, Denmark, France, Germany, the Netherlands, Sweden, the United Kingdom, and the United States.

Integrum AB is a publicly-traded company (INTEG B: Nasdaq First North exchange) based outside of Gothenburg, Sweden, with a US subsidiary in San Francisco, CA. Since 1990 osseointegration, the science behind the OPRA™ Implant System has been helping individuals with amputations towards an improved quality of life. Thorough surgical experience gained over almost three decades from 500 surgeries in 14 countries has led to the development of Integrum's system for bone-anchored prosthetics – a beneficial alternative to the traditionally used socket prosthesis. Integrum's OPRA™ Implant System was approved by the US Food and Drug Administration (FDA) in 2015 for use in the US under a Humanitarian Use Device (HUD) designation, which was reviewed through the Humanitarian Device Exemption (HDE) pathway, which limited the level of marketing and sales activities. In December 2020, Integrum successfully completed the most stringent medical device regulatory procedure in the world, and based on the solid scientific data submitted, was granted a PMA by the FDA for the OPRA™ Implant System, which is the only technology approved for above knee, bone-anchored prosthetics in the U.S. More information on the company and its innovative solutions for amputees can be found at www.integrum.se
