

A significant breakthrough for Safeture in the Netherlands

Safeture AB in Lund has signed a 3-year agreement via partner with one of the largest financial institutions in the Netherlands. The agreement gives end-users access to Safeture's unique platform for managing employee safety.

The agreement is worth 220,000 Euros.

A year ago, in line with the global expansion strategy, Safeture decided to increase its presence in the Benelux area since the market is appealing to the company. The signed agreement via the partner and risk advisory company Forth Global B.V. is an important breakthrough that creates additional business opportunities for Safeture.

Safeture is an international Software as a Service (SaaS) company headquartered in Lund. The company has developed a cloud-based employee safety and mobility platform that handles the safety of all employees. More than 3,500 companies worldwide already use Safeture to protect their employees and manage their security while out-of-office work increases.

With Safeture's security platform and patented geo-positioning technology with the highest security standard, the end client, the Dutch financial institution, can locate its employees and provide them with relevant and vital information via available communication channels, regardless of where they are.

"As a technology provider, Safeture is proud to, together with risk advisory company Forth Global begin providing services to a top tier institution in the Netherlands," says Magnus Hultman, CEO of Safeture.

"This is another example of our partnering strategy bearing fruit after further investments and development in the sales organization."
