

Safeture Announces Partnership with Dubai-Based Sicuro Group

Safeture AB, a global leader in employee safety and people risk management technology, today announced a strategic partnership with Sicuro Group, a Dubai-headquartered operational risk management consultancy and travel risk management provider with over two decades of experience and response network across more than 140 countries.

The partnership combines [Safeture's](#) flexible SaaS platform with [Sicuro Group's](#) proven global response capabilities, 24/7 GSOC operations, and risk advisory expertise. Together, the two companies will deliver comprehensive technology-enabled travel risk management solutions to organizations operating in complex environments worldwide.

"This collaboration enhances our ability to provide organizations with both the digital tools and the operational expertise required to protect their people," said **Magnus Hultman, CEO of Safeture**. "Sicuro's global response capability and travel risk management expertise are a perfect complement to Safeture's technology."

Operating globally from its base in Dubai, Sicuro Group has established itself as a trusted partner to Fortune 500 corporations, multinationals, NGOs, and international organizations through its 24/7 GSOC, crisis response, and travel risk management programs. The addition of Safeture's platform expands Sicuro's technology portfolio, enabling the company to serve a broader spectrum of clients, particularly NGOs, mid-market organizations, and clients requiring highly customized risk information solutions.

"We're committed to delivering the right solution for each client's unique operational requirements," said **Rafal Hys, CEO, Sicuro Group**. "Safeture's platform provides the flexibility we need to integrate our proprietary risk feeds and deliver bespoke, analyst-driven assessments tailored to specific client needs. This partnership allows us to offer an accessible, technology-driven platform that complements our existing enterprise-level solutions, ensuring we can serve organizations of all sizes across our global footprint with the same standard of excellence."

The collaboration enables Sicuro to provide clients with real-time risk information, location awareness, and crisis communication capabilities, all while maintaining the ability to customize the platform with Sicuro's own analyst-generated content and Request for Information (RFI) services delivered through its 24/7 Global Security Operations Center.

The partnership represents a significant expansion in both companies' efforts to help organizations worldwide build resilience and make informed risk decisions in uncertain environments.
