

## Safeture Adds TravelpoolEurope to Its Growing Ecosystem within Travel Management

Safeture in Lund Sweden, the global SaaS platform for employee safety and integrated travel risk management, announces a new strategic partnership with **Travelpool Europe**, a member-owned shared service center for travel procurement, offering smarter ways to buy and manage business travels worldwide.

TravelpoolEurope (TPE), the world's only member-owned shared service center for travel procurement, will incorporate Safeture's technology into its offerings. This provides TPE's member companies with access to advanced risk management features, including real-time incident monitoring, automated safety workflows, traveler communication tools, and a unified global view of staff location and mobility.

The partnership further supports Safeture's rapid growth in the travel management sector. Over the past year, Safeture has consistently expanded its network of travel protagonists to meet rising market demand for seamless, tech-enabled duty-of-care support embedded in the travel ecosystem. The agreement with Travelpool Europe strengthens this strategy by bringing on board a partner with a strong global presence.

As global mobility continues to grow and risk environments evolve, incorporating safety technology into core travel services has become vital for organizations seeking to protect travelers at scale. Safeture's expanding travel management ecosystem ensures that business travel programs gain better visibility, quicker response times, and stronger risk management practices.
