**Scandion Oncology A/S** is a biotechnology company that addresses and tackles one of the greatest challenges in modern oncology - the effective treatment of cancer which contains chemotherapy-resistant cells or which has developed resistance to a previously prescribed cancer-fighting drug. In preclinical in vitro-studies SCO-101 restores chemotherapy sensitivity in resistant cancer cells. Moreover, in animal studies, the company's leading candidate drug, SCO-101, significantly enhances the efficacy of certain standard cancer treatments when given in combination. Scandion Oncology is now in clinical phase II trials with its lead compound, SCO-101, in patients with chemotherapy-resistant colorectal cancer. In addition to SCO-101 the Company has two other drug candidates, SCO-201 and SCO-301. Scandion Oncology was listed on Spotlight Stock Market, Sweden in November 2018.
