

NeoDynamics participates on Stora Aktiedagen and in a Live Session with Småbolagsjakten today

NeoDynamics AB (publ) ("NeoDynamics") – with a new patented micropulse technology to simplify and improve the precision in biopsy procedures – will participate on Stora Aktiedagen in Gothenburg today, on the 12th of November 2018. CEO Anna Eriksrud and CFO Jörgen Vrenning will present the company and its plans for the future. Furthermore, the company will also participate in a Live Session with Småbolagsjakten today. For more details, see below.

Date and time	Event	Place	Registration
November 12, 2018 08:00 - 21:00	Stora Aktiedagen Göteborg	Svenska Mässan, Mässans Gata 8, Gothenburg	Registration is made at www.aktiesparama.se
November 12, 2018 18:30 – 19:30	Live Session with Småbolagsjakten	Online, in the Facebook group "Aktier – Småbolagsjakten"	Registration is made at https://www.facebook.com/groups/smabolagsjakten/

About the Live Session

During the session, it is possible to ask questions directly to the company in Swedish or English. Answers will then be given in English. To participate in the session, you must become a member in the Facebook group "Aktier – Småbolagsjakten". Register your member application in good time to be sure to become a member. To do this, click the green "+ Gå med i grupp" button on the "Aktier – Småbolagsjakten" homepage. "Aktier – Småbolagsjakten" is the largest Facebook group in the Nordic region focusing on listed small companies. The group has over 37,000 members.

About NeoDynamics

Every year, approximately 2.1 million women worldwide are diagnosed with breast cancer, increasing by five percent per year. NeoDynamics has developed the NeoNavia® biopsy system which facilitates and improves tissue sampling (biopsies) in breast cancer patients, with a new patented micropulse technology. This method gives better precision and better control. In close collaboration with leading clinicians, NeoDynamics have gained experience of having used the technology in more than 300 procedures at around 15 university hospitals across Europe. NeoDynamics is currently completing development of the commercial version of NeoNavia. Among several design and usability features it integrates micropulse technology with multiple needle options for maximum versatility. NeoNavia is expected to be launched towards the end of 2019 in a breast biopsy market worth approximately USD 500 million per year. The technology is likewise suited for cancer diagnostics in other organs such as prostate, lung, kidney and liver.
