

Industrial Solar GmbH joins Austria Solar

Industrial Solar GmbH proudly announces its membership in the Austria Solar industry association.

On June 25th, 2020, the board of Austria Solar decided to admit Industrial Solar GmbH in their association. Austria Solar brings together most well-known suppliers of solar heating systems. The association was founded 1999 in Vienna and represents the interests of over 100 companies, from manufacturers and suppliers to dealers and installers. All renowned Austrian R&D facilities for solar heating are also represented in the association. With the Austria Solar Quality Label, the association promotes quality assurance on the market, provides information on current developments through proactive public relations work and is a competent partner for authorities and administration when it comes to general conditions. Austria Solar is a member of several associations and platforms like Solar Heat Europe and "Dachverband Energie-Klima" in the chamber of commerce and has partly co-founded them.

Christian Zahler, CEO of Industrial Solar GmbH, is very pleased about the admission: "The association Austria Solar unites a big number of well-known companies and research centers with the goal of promoting solar thermal and sustainable heating systems. With their excellent work over the last years they were able to attract international members of five countries in Europe. We are looking forward to cooperating with the management as well as the members of Austria Solar to foster the market for large-scale solar thermal systems for industrial process heat and district heating applications. We are happy to contribute with our longstanding experience in the field of large-scale solar heating and cooling."

Industrial Solar Holding Europe AB
