

Clean Industry Solutions launches new website

After having undergone some significant changes during the last 2 years, Clean Industry Solutions now launches its new website that presents the company's business strategy and provides all information for interested investors.

In the last year, Clean Industry Solution (CISH) has experienced a major transformation. Not only has the holding acquired a second subsidiary, SolarSpring GmbH, and therefore complemented its portfolio with additional sustainable solutions, but also its first subsidiary, Industrial Solar GmbH, has broadened its range of services. Thus, the company, or the subsidiaries, respectively, offer holistic solutions for the supply of clean energy and clean water for industry and help their customers to become environment-friendly and to green their production processes. This expansion of the product range also led to the name change earlier this year from Industrial Solutions Holding Europe AB to Clean Industry Solutions Holding Europe AB.

Now, CISH proudly announces the launch of its new website that provides visitors with information on CISH's business model as well as on the company's activities and investor related data – just in time for the change of listing from Spotlight Stock Market to Nasdaq First North Growth Market, which will happen next Monday and marks an important step in the company's history.

“Many thanks to Jellyfish.media GmbH who has been our partner in the development of our new website and we look forward to welcoming our visitors to cleanindustriesolutions.com,” says Christian Zahler, CEO of CISH.
