

## Bisnode strengthens its offering within bank account information

**Bisnode has started a strategic partnership with Tink, Europe's leading open banking platform. The partnership will enable Bisnode to provide bank account data based on Tink's account aggregation and data enrichment technologies in 7 of its markets across Europe.**

"This is an important strategic move for Bisnode to build strength in our future risk and credit offerings," says CEO Magnus Silfverberg.

The partnership with Tink will strengthen Bisnode's leadership in the risk and credit space and give customers access to key datasets for risk decisions. In combination with Bisnode's strong offering in credit reports and credit scores, bank account data will be an important basis for making credit decisions in the near future.

"This will be a game changer for lenders in the future and thus for Bisnode as a key provider of risk and credit data," says CEO Magnus Silfverberg.

### **About Ratos:**

*Ratos is a corporate group consisting of 12 companies divided into three business areas: Consumer & Technology, Construction & Services and Industry. In total, the companies have SEK 38 billion in sales and EBITA of SEK 1.8 billion. Our business concept is to develop medium-sized companies with headquarters in the Nordic region that are or have the potential to become market-leading. We make it possible for independent medium-sized companies to excel by being part of something larger. A focus on people and leadership, culture and values are key components of Ratos. Everything we do is based on our core values: Simplicity, Speed in Execution and It's All About People.*
