

# TFS in partnership to conduct a global study on COVID-19 pandemic

**TFS forms a partnership to conduct a real-world evidence study on COVID-19 pandemic to inform decision-makers.**

As the COVID-19 pandemic continues to spread there is an increased need to analyse real-world evidence for prioritized questions shared by national governments and public health agencies. TFS partners with Observational Health Data Sciences and Informatics (OHDSI) for the study, where TFS role will be to analyse the data that is collected from several Spanish Hospitals.

Analysing real world evidence, enables TFS to help inform decisionmakers using up to date information and provide immediate insights, where all real-world evidence will be made available in the public domain, while protecting patient's privacy.

"I am very proud of TFS assisting the global efforts battling COVID-19. This study, combined with other ongoing efforts, can give insight that will assist health care professionals and decision markers, in fighting the pandemic" says Medical Doctor Bassem Saleh, CEO of TFS.

**About Ratos:**

*Ratos is a corporate group consisting of 12 companies divided into three business areas: Consumer & Technology, Construction & Services and Industry. In total, the companies have SEK 38 billion in sales and EBITA of SEK 1.8 billion. Our business concept is to develop mid-sized companies headquartered in the Nordics that are or can become market leaders. We enable independent mid-sized companies to excel by being part of something larger. A focus on people and leadership, culture and values are key components of Ratos. Everything we do is based on Ratos's core values: Simplicity, Speed in Execution and It's All About People.*
