INVISIO releases updated information regarding US Marine Corps

In 2019 INVISIO was selected for the US Marine Corps Hearing Enhancement Program and received a first order of SEK 43 million. The order consisted mainly of INVISIO's advanced hearing protection systems with communication and was delivered in 2019.

The US Marine Corps has now revisited its needs. INVISIO does not therefore expect any major orders from the US Marine Corps in the near future.

"We have been very proud to support the US Marine Corps with our advanced communication systems and user feedback has been very good. It is our impression that in the near term the US Marine Corps will predominantly be procuring simpler hearing protection without radio communication abilities. We look forward to supporting the US Marine Corps when more advanced needs emerge in the future", said Lars Højgård Hansen, CEO of INVISIO.
