

Join Games releases a new American Roulette!

The American Roulette goes back to 1796 where the games are described in a book. The early stage of the American Roulette made it up from New Orleans to Mississippi. It was there that, due to the rampant cheating by operators and gamblers, that the wheel eventually was placed on top of the table to prevent devices to be hidden in the table or the wheel. This evolved into the American Roulette. Honesty, Truth and FUN are trademarks of the roulette.

Here are the winning probabilities for each bet type:

BET	WINNING PROBABILITIES
